Improving and Sustaining Quality over the Life Cycle of Programs

Lily Gleicher, M.S., ABD, Research Analyst, Illinois Criminal Justice Information Authority

This presentation provides a brief overview of evidence-based practices (EBPs) and logic models, with a focus on implementation science. Implementation is defined as the set of specified, purposeful, and detailed processes designed to put an innovation into practice. In particular, this presentation will provide information regarding the importance of implementation fidelity, functional stages of implementation, core components of implementation, common implementation barriers, and program adaptation/modification.
