ARI Logic Models -- Intensive Supervision Probation with Services

Purpose: To divert non-violent offenders from prison who would benefit from monitoring, services, and evidence-based programming

			Outcomes		
Inputs	Activities —	Outputs	Short	Medium	Long
Crime Reduction			Divert at least 25% of	Reduce prison overcrowding	Greater public safety
Act	Use consistent selection criteria	ſ	caseload from prison		
		# clients enrolled		Reduce reliance on	Improved public safety
Federal & state	Define and target high risk		Improve treatment outcomes	incarceration for non-violent	
funding	population using screening,	# clients complete LSI-R		offenders	Stronger social service safety
	assessment & intakes		Fewer arrests, jail stays,		net for people with SUD
ARI Oversight	- Program and individual	# clients with program requirements	reconvictions	Lower criminal justice system	
Board	client goal setting & conditions		cost to tax payers	More effective use of tax	
		e conditions	Improved restitution		dollars
ARI Staff	Evidence-based practices	# in-person visits with clients	payments	Reduce recidivism, crime, and	
	determine length of	- # clients receiving evidence-based		victimization	Client no longer criminal
Local ARI	treatment	treatment	Better data for decision-		justice involved
Program Site	-		making	Budgeting for results	
Staff	Use program phases	# clients completing each phase of		Client completes probation	
	related to client progress	the program	Community supervision for		
Service			non-violent offenders	Meet service needs	
Providers	Ensure smaller caseloads with				
	monitoring and case	Average probation staff caseload	Smaller probation caseloads	Demonstrate program	
Target	management		-	effectiveness using program	
population:	Link probationer with services	# clients linked to services	Program retention and	evaluations	
Non-violent,			graduations		
high risk	-	# program graduates			
offenders	Process and outcome evaluatio		Balance enhanced		
ICJIA staff		# arrests during program	surveillance and control with		
		# sent to IDOC	rehabilitative services		
	_	% of reduction goal attained			
Assumptions: behavior change is possible for people at risk for incarceration with			External Factors: state fiscal environment, crime trends, changes in corrections and criminal		
adequate support, supervision, and treatment.			justice policies; other reform policies and laws; change in federal administration.
